

If Reindeer Pulled Streetcars

If reindeer pulled streetcars what an interesting sight
Let's imagine that for a minute, hold on sit tight

Once upon a time in a place right here
Walking was the only way to get far and near

Next came the horses who worked day after day
pulling passengers on streetcars along the streets of PA

What a joyous relief to be out of the mud
But what about all of that horse poop (oh, crud!)

If reindeer pulled streetcars how fast would they go?
Even with electric most went rather slow

With the reindeer all busy what is Santa to do
would Christmas still come, for me, for you?

But horses, like streetcars, are important you see
sometimes being slow gets us exactly what we need

A spark to make travel faster and better
to school and to work, let's all ride together

With a pole on top to reach up to the wire
we'll speed down the tracks and never tire

But reindeer don't pull streetcars
That much is true
So a wish for a bright season will have to make do

With a sprinkle of magic from our friends the reindeer
PTM shares with all some holiday cheer
